

2014 - The iconic line of tables called Insula, designed by Ernst & Jensen, has been expanded by a new version called Insula Base. The table comes with round base. The design gives the table a very cool and elegant expression - and you do not have any table legs to "struggle" with. The top is in a brand new silk soft laminate, based on nanotechnology and with fantastic qualities. The Insula Base comes in black or white and in multiple sizes. It is available as dining-, meeting- and coffee table.
