

PUSH COFFEE MAKER

FURNITURE / LIGHTING / ACCESSORIES

PRODUCT FACT SHEET

METTE DUEDAHL ON THE DESIGN "PUSH puts a new perspective on coffee making – pushing the drinking of coffee to a higher level. The soft and pleasant feel of the stoneware is reflected in the rounded, smooth shape of the jug. I wanted to make a coffee press, which is both soft to look at and soft to hold. The friendly shape goes hand in hand with the warm and cozy atmosphere that a good cup of coffee provides. PUSH is s characteristic coffee press with a contemporary Nordic design."

PROCESS

Clay mass is poured into a mold, dried, hand processed and finally burned. The jug is glazed on the inside, while the raw stone is kept on the outside.

DESIGNED BY / YEAR OF DESIGN

Mette Duedahl / 2013

TYPE

Coffee press

DESCRIPTION

The Push coffee maker has a contemporary design, yet with warm and rounded shapes. Use the jug for it's original purpose of making coffee or take out the plunger unit and use the jug for serving water or other beverages.

ENVIRONMENT

Indoor

DIMENSIONS (CM)

Height: 20 Ø: 10 ML: 1000

MATERIAL

The jug is made of stoneware. Plunger unit is made of steel and the lid is made of plastic. Comes with a beech wood knob and a rubber knob.

CLEANING INSTRUCTIONS

Dishwasher safe, except for wooden knob. Separate all elements before cleaning.

ABOUT THE DESIGNER

Mette Duedahl is a Danish designer, who graduated in 2011 from the Royal Danish Academy of Fine Arts, Center for Glass and Ceramics, Bornholm. She exhibited as an 'Upcoming designer' in the curated New Note area at Formland in August 2011, and was part of the Crafts Collection 17 exhibited at Maison et Objet, Paris 2013. Mette is inspired by everyday life and needs, and aims to design innovative and honest objects where high use-value is combined with a simple aesthetic design.
