

Hans Sandgren Jakobsen is fascinated by the geometric simplicity and thus, he has created a wall lamp in an utterly clean form where each detail is justified. Radon consists of a circular wall bracket and a semi-spherical shade. The switch is placed at the top of the lamp for easy handling. The Radon wall lamp offers both an indirect and a direct light as the shade can be orientated from 0 to 90 degrees. The shade is multi-directional and furnished with an asymmetrical reflector, ensuring that light spreads out precisely to the surface where it is needed.

FACTS

COLOURS/SURFACE

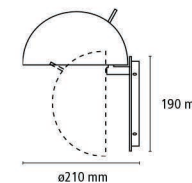

Nigra: Matt black lacquer

Alba: Matt white lacquer

MATERIAL

Shade: Sandblasted aluminium laquered

Base: Moulded steel and steel bars covered in matt chrome

PRODUCT NAME	PRODUCT CODE	DESCRIPTION	LIGHT SOURCE
